

WHY USE THE TECHNOLOGY?

- *Personal safety* increases for users of these systems when compared with traditional armoured methods because weapons and aggressive violence do not overcome the technology.
- *Security* - During the past 10 years when alternative systems have been used, robberies have moved to easier targets such as armoured vehicles.
- *Efficiency* - Containerising cash improves logistical flow, reducing the need to count packages. Because there is no access to cash, as few as one guard can be used to transport the money. Moreover, Insurance fees could be reduced in this perspective.
- *Impact on society* - Ink staining systems remove the responsibility from the guard to protect the cash, thus removing the need to carry weapons in a public place. This has a reciprocal effect on the use of weapons during robberies.
- *Environment* - No armoured means for smaller lighter vehicles and therefore reduced fuel and tyre consumption with subsequent reduction in emissions and use of non-sustainable resources.

...WE BELIEVE IN A NEW WAY TO TRANSPORT CASH
